Quarterly report

Engineering and product · prepared by Nora Lindqvist and Michael Torres

Uptime	p95 latency	Active tenants
99.97%	184 ms	1,284

Highlights

Beacon reached feature-complete and passed the 48-hour soak at three times peak traffic. The website redesign goes live with the launch. Support volume fell 18% after the status page and the new error pages shipped.

Next quarter

Beacon general availability, migration tooling for long-poll customers, and the first external audit of the delivery signing scheme.
